Technical Parameters

1	Model	GW-H200
2	power supply	220V/110V 50/60HZ
3	Air pressure	0.6Kpa-0.8Kpa
4	wire diameter	0.1-0.5 mm
5	Complete the max. outer radius	50mm
6	Complete the min. inner radius	30-50mm

Advantages and Features:

1. High Winding Precision

The machine ensures accurate control of tension, turns, and winding speed, resulting in consistent and uniform coil formation suitable for high-quality transformer cores.

2. Semi-Automatic Operation

Combines automated winding control with manual loading/unloading, reducing labor intensity while keeping the workflow flexible and easy to operate.

3. Stable Tension Control System

Equipped with a reliable tension adjustment mechanism to maintain constant wire tension, preventing deformation, wire stretching, or uneven winding.

4. Half-Round Core Compatibility

Specifically designed for half-round or semi-circular transformer core structures, enabling efficient and stable winding along curved surfaces.

5. Improved Production Efficiency

Automating key winding steps significantly increases output compared to fully manual winding, while maintaining high repeatability.

6. User-Friendly Interface

Features an intuitive control panel with adjustable parameters such as speed, turns, direction, and tension, making it suitable for operators of all experience levels.

7. Durable Mechanical Structure

Built with high-strength components and precision bearings to ensure long-term stability, low vibration, and minimal maintenance requirements.

8. Safety Protection Design

Includes emergency stop buttons, protective covers, and overload safeguards to ensure safe operation during production.

9. Wide Application Range

Suitable for various transformer types, inductors, and magnetic components that use half-round cores or require precision curved-surface winding.

PRACTICAL APPLICATION :

TRAINING CUSTOMER TO OPERATE WINDING MACHINE :

- 1.All service engineers with 10 years experience are gotten special technology training, who can deal with various breakdown problem.
- 2.Guide the user to use accurately and how to maintain the Digital CNC Wire Coil Winding Machine.

Provide free consultation about production process technology of electronic products.

- 3.In order to guarantee the machine used normally, we'd have training on how to operate, use and maintain our product by English manual, video, guiding on line.

PACKAGING:

Packaging Material: Carton/Wooden case with foam inside.

1.General package(Paper carton or plastic bag): For small equipped parts for Digital CNC Wire Coil Winding

Machine, Package it with form and pack paper to guarantee unbroken during the transport.

2.Wooden case package: For larger scale Digital CNC Wire Coil Winding Machine, we have special skilled

carpenter, who would make the proper wooden case with exact thickness, density, length. The up arrow ↑ marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.

FACTORY:

We-GREWIN INDUSTRIAL GROUP is expert in winding machines line s for 28Years. Our Grewin have ISO9001:2015,CE approvals,Machines'P atents,"high-tech enterprises"by the government.
